

STEPS TO ALTER TEMPLATE

<https://w3layouts.com/preview/?l=/acreage-real-estate-flat-bootstrap-responsive-web-template/>

HEADER

- Copy about.html -> index.html
- index.html: Edit header section until you have “Home”, “Research”, “CV”, “Publications”, and “Contact” as options along the top. Delete “phone” thing on top.
 - Fancy: change margin in line 102 of style.css from 1.5 to 2 to adjust spacing. Found by: `grep -r “menu—francisco” *`
- Place “” where you would like it to jump to.
- Copy your CV as “CV.pdf” into images directory
- Add a link to your publications list online, or create a simple page with a link of your publications

BANNER

- Set data-wow-delay="0s" everywhere (I find it irritating)
- Find replacement picture. Look up pixel dimensions of their image (1680 × 700) so you can make it the same size. Save it over banner.jpg.
 - Actually did 1680 x 440 for my image

FOOTER

- Insert: `` at the end of the first line of the footer, so Contact link will jump here.
- Change “About Us” to “Contacts”.
- Add contact info.
- Remove Subscribe section.
- Alter “Latest Tweets” to be the second column of contact info
 - Delete title, and insert `

` so it lines up.
Then insert additional contact info.
- replace labels at the bottom of the page with the ones you wrote in the header

YAY! NOW IT'S ALMOST TIME FOR CONTENT

- You now have the framework for your pages. Copy `index.html` to `research.html`.
- Now we will finalize `index.html`

FINISH INDEX.HTML

- Create simple page with a paragraph about yourself and a photo
- Remove text between `<!-- team -->` and `<!-- //pricing-plans -->`. We only need one section for this page.
- Now edit “about” section.
 - Remove titles and other sections until you just have text and an image. Replace the image with an image of yourself.

FINISH RESEARCH.HTML

- Open research.html
- Move “menu__item—current” in header from Home to Research
- First section (titled “about us”) is fine as is
- Replace next two sections with the adapted section in index.html for a simple format
- DONE!
